Product Change Notification:

Miller Stephenson has announced they will no longer manufacture MS-470C conformal coating material once their current stock is depleted.

ABX Engineering will be switching to the HumiSeal 1A33 product when the Miller Stephens MS-470C is no longer available. The HumiSeal 1A33 is also a Urethane material just like the Miller Stevens MS-470C. See attached data sheet.

Thank you,

HumiSeal®

HumiSeal® 1A33 Urethane Conformal Coating **Technical Data Sheet**

HumiSeal® 1A33 is a single component, polyurethane conformal coating, suitable for general printed circuit board applications. HumiSeal® 1A33 contains no free isocyanates and fluoresces under UV light for inspection purposes. HumiSeal® 1A33 coating is MIL-I-46058C qualified, IPC-CC-830B and RoHS Directive 2011/65/EC compliant and recognized under UL File Number E105698.

Properties of HumiSeal® 1A33

Density, per ASTM D1475 Solids Content, % by weight per Fed-Std-141, Meth. 4044 Viscosity, per Fed-Std-141, Meth. 4287

Recommended Coating Thickness

Drying Time to Handle per Fed-Std-141, Meth. 4061 Optional Curing Conditions to Reach Optimum Properties

Recommended Thinner (dipping, brushing)

Recommended Thinner (spraying)

Recommended Stripper

Shelf Life at Room Temperature, DOM Thermal Shock, 50 cycles per MIL-I-46058C Coefficient of Thermal Expansion - TMA

Glass Transition Temperature - DSC

Modulus - DMA

Flammability, per UL 94

Dielectric Withstand Voltage, per MIL-I-46058C Dielectric Breakdown Voltage, per ASTM D149

Dielectric Constant, at 1MHz and 25°C per ASTM D150-98 Dissipation Factor, at 1MHz and 25°C per ASTM D150-98

Insulation Resistance, per MIL-I-46058C

Moisture Insulation Resistance, per MIL-I-46058C

CTI, PLC per UL746E @ 600 volts Fungus Resistance, per ASTM G21 0.95 ± 0.02 g/cm³

Application of HumiSeal® 1A33

Cleanliness of the substrate is of extreme importance for the successful application of a conformal coating. Surfaces must be free of moisture, dirt, wax, grease, flux residues and all other contaminants. Contamination under the coating could cause problems that may lead to assembly failures.

Dipping

Depending on the complexity, density and configuration of components on the assembly, it may be necessary to reduce the viscosity of HumiSeal® 1A33 with HumiSeal® Thinner 503 in order to obtain a uniform film. Once optimum viscosity is determined, a controlled rate of immersion and withdrawal (5-15 cm/min) will further ensure even deposition of the coating and ultimately a uniform film. During the application, evaporation of solvent causes an increase in viscosity that should be adjusted by adding small amounts of HumiSeal® Thinner 503. Viscosity in the dip tank should be checked regularly, using a simple measuring device such as a Zahn or Ford viscosity cup.

HumiSeal®

HumiSeal® 1A33 Technical Data Sheet

Spraying

HumiSeal[®] 1A33 can be sprayed using conventional spraying equipment. Spraying should be done in an environment with adequate ventilation so that the vapour and mist are carried away from the operator. The addition of HumiSeal[®] Thinner 521 or 521EU is necessary to ensure a uniform spray pattern resulting in pinhole-free film. The amount of thinner and spray pressure will depend on the specific type of spray equipment used and operator technique. The recommended ratio of HumiSeal[®] 1A33 to HumiSeal[®] Thinner 521 or 521EU is 4:1 by volume; however the ratio may need to be adjusted to obtain a uniform coating.

Brushing

HumiSeal® 1A33 may be applied by brush. Uniformity of the film depends on component density and operator's technique.

Storage

HumiSeal® 1A33 should be stored away from excessive heat or cold, in tightly closed containers. HumiSeal® products may be stored at temperatures of 0 to 35°C. Prior to use, allow the product to equilibrate for 24 hours at a room temperature of 18 to 32°C.

Caution

Application of HumiSeal® Conformal Coatings should be carried out in accordance with local and National Health and Safety regulations.

The solvents in HumiSeal® 1A33 are flammable. Material should not be used in presence of open flame or sparks. Use only in well-ventilated areas to avoid inhalation of vapours or spray. Avoid contact with skin and eyes.

Consult MSDS/SDS prior to use.
